

Do you have areas in your community that look like this?

Below is the #1 problem resulting in **CONCRETE** work.

A tree's root system can often times cause lifting and damage to your community's concrete and sidewalks within your landscape. Not only is this a major hazard, it is not aesthetically pleasing to your community!

If you have a minimum of 50 sq. feet of possible concrete work in your landscape at any of your communities, do not hesitate to contact us!

Here at Pacific Green Landscape we do:

Specialized
Concrete Work & Root Barriers

Contractor's License # 462677

STEPHANIE LUNDSTROM
