Landscape Irrigation Rebates! You may be eligible!

Metropolitan Water District is offering a rebate of \$2.00 per square foot up to 50,000 square feet of converted turf grass area per service address per year. Depending on the conversion methods used in your Turf Replacement project, you may be eligible for additional rebates on devices such as weather based irrigation controllers, soil moisture sensors and rotating sprinkler nozzles. For information on available outdoor device rebates, please visit the [outdoor device](#) page. ***Pacific Green Landscape recommends our clients take advantage of this opportunity! Call us today to see how we can help you qualify for this program – 800-439-9962.***

Below is the breakdown of the rebates for outdoor irrigation equipment conversions. Click on each equipment title to learn more about the eligibility requirements:

Landscaping Equipment

Weather Based Irrigation Controllers:

\$35/Station – Eligible WBIC can have a maximum of 11 inactive stations per controller

Rotating Nozzles for Pop-up Spray Heads:

\$2/Nozzle (minimum of 30)

Large Rotary Nozzles: 13/Set (8 set minimum)

In-stem Flow Regulators: \$1/Regulator (25 device minimum)

Soil Moisture Sensor Systems: \$35/Irrigation controller station – Eligible SMSS can have a maximum of 11 inactive stations per controller

Staff Spotlight-Lorenzo Ramirez

How long have you worked at Pacific Green and what is your role?

I have worked At PGL for almost 3 years and now I am an Account Manager.

What do you like best so about working here?

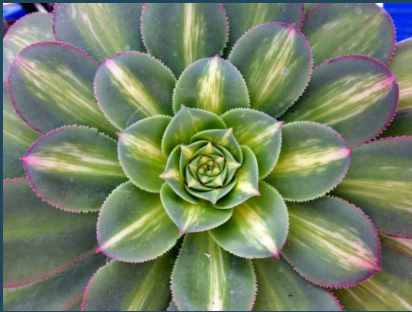

The support and the great people helping me become the best Account Manager.

What has been your favorite project to work on at Pacific Green?

Safety, since the company has the best safety program, I feel great contributing to make it a safe environment for the crews.

Property ingredients | Company highlights

Plant Highlight: Aeoniums

Aeoniums are odd looking succulents, with long, arching stems and rosettes of leaves that can often look artificial. There are about 35 species and most are native to the Canary Islands. They prefer a Mediterranean climate - not too hot, not too cold, not too dry. This is a beautiful succulent you may see in planter beds or pots around your property!

Happenings at Pacific Green Landscape-Safety is a Top Priority!

Safety and quality are top priorities for Pacific Green Landscape. Recently at our Lakeside yard we did vehicle inspections – checking truck, cab and trailer for any concerns. Be assured – we do vehicle inspections on a regular basis to keep them running in tip top shape and to ensure safety!
