November Planting

November is the perfect time for installing winter annuals to add a richer color to the grounds. Adding winter color in and around your properties is a great way to make everyone feel that the grounds are intentionally well cared for and ready for the colder seasons. We suggest cyclamen, poinsettia, or pansies to accent your planters and medians. We also recommend ornamental kale, flowering stock, and violas. We plant color with smart fertilizer, allowing for slow release to ensure perfect color for the season. Insecticides are also used to help prevent infestations and promote good health.

Call us today to install winter plants at your property! 800-439-9962

Staff Spotlight- Alan Flores

Alan Flores joined our PGL work team in 2017. He started as a Production Manager and quickly learned all aspects of his role. He has done a great job and was recently promoted to Sr. Production Manager. Alan is a motivated landscape professional that earned his QWEL (Qualified Water Efficient Landscaper) certification and is currently working on completing his CLCA Water Management Certification. He has appreciated the opportunities that have come his way for growth in his career. Alan has made significant contributions both in production and in our safety program. In his spare time he enjoys spending time with his lovely family (wife and three children).

Tagetes Lemmonii 'Mexican Marigold'

This bushy evergreen shrub can grow over six feet tall and spread 6-10 feet wide. In fall-winter months, orange-

yellow flowers bloom since the flowering is triggered by short days and overcast weather. The Mexican Marigold thrives best when planted in part-shade in well-drained soil.

Happenings at Pacific Green Landscape

Our team recently worked hard on installing this beautiful 48 inch coral tree during a large landscape renovation at one of our HOA client properties.

Nice work team!
